

Ali Zain

Full-Stack Developer • AI Builder • Student Developer

✉ energetickids02@gmail.com </> github.com/az201214 🌐 az201214.github.io/My-Portfolio

🎓 Grade 9 (O Levels) • Age: 14

Student developer and hands-on AI builder driven by creating end-to-end web, mobile, and intelligent software systems. Specializing in TypeScript, Next.js, Supabase, Flutter, and AI model integration, turning complex requirements into production-ready, performant products with high aesthetic standards.

FEATURED PROJECTS

NexusInsight CRM

Creator & Full-Stack Dev

A full-stack multi-tenant B2B workspace and CRM system designed for structured team collaboration and pipeline management.

- Engineered multi-tenant data architecture with role-based access control (RBAC).
- Implemented workspace management, task boards, and real-time database sync.
- Built complete UI design system with responsive layouts and automated workflows.

TypeScript Next.js Supabase PostgreSQL Tailwind CSS

Rally — Sports Matchmaking Platform

Mobile App Lead

Cross-platform mobile application matching padel players and groups based on location, skill level, and schedule availability.

- Designed interactive matchmaking algorithm for solo players and incomplete doubles pairs.
- Integrated real-time database and cloud messaging for live notifications and instant chat.
- Optimized native-feel smooth UI transitions across both iOS and Android.

Flutter Dart Firebase Cloud Firestore Realtime Sync

Meetily — AI Meeting Assistant

Open-Source Contributor

Exploration into privacy-first AI meeting intelligence utilizing local speech models and offline LLMs.

- Forked and adapted an open-source codebase to integrate localized Whisper models.
- Engineered automated summarization and action-item extraction workflows via Ollama.
- Contributed improvements to backend concurrency and system performance.

Rust Whisper Ollama Local LLMs Audio Processing

3D Interactive Web Portfolio

Sole Developer

Immersive 3D web experience with encrypted GLTF assets, dynamic studio lighting, and smooth GSAP scroll interactions.

Three.js React Three Fiber GSAP TypeScript WebGL

TECHNICAL SKILLS

Languages

TypeScript, JavaScript, Dart, Rust, HTML5, CSS3, SQL

Frontend & Mobile

React, Next.js, Vite, Tailwind CSS, Flutter, Android

Backend & Database

Node.js, Express, Supabase (PostgreSQL), Firebase, REST APIs

AI & Emerging Tech

LLM Integration, Ollama, Whisper, Generative AI, Automation

3D & Creative Web

Three.js, React Three Fiber, React Three Drei, WebGL, GSAP

DevOps & Practices

Git, GitHub Actions, Auth/RBAC, Unit & E2E Testing, Performance

EDUCATION

O Levels (Cambridge Curriculum)

Grade 9 • Current

Focus on Sciences, Mathematics & Computer Science.

ACHIEVEMENTS

- Top 10 Finalist** — Code Bash Programming Competition
- 1st Academic Position** — School Grades 6, 7 & 8 (consecutively)

LANGUAGES & FOCUS

English (Fluent) Urdu (Native)

AI Systems Full-Stack SaaS Mobile Apps
